Passing Batch: 2024 – 2027

SUMMARY

Final-year B.Tech Computer Science (Data Science) undergraduate with a strong foundation in Java, Python, Data Structures & Algorithms, DBMS, Operating Systems, and System Design. Experienced in developing AI-powered applications, backend systems, REST APIs, and multi-agent solutions using LLMs, RAG, and modern AI frameworks. Passionate about building scalable, cloud-native enterprise applications and solving real-world business problems through AI while continuously learning emerging technologies and software engineering best practices.

EDUCATION

B.Tech, Computer Science and Engineering (Data Science) — CGPA: 9.1 / 10.0
Gokaraju Rangaraju Institute of Engineering and Technology (GRIET) | Expected Graduation: June 2027

Diploma, Computer Science and Engineering — CGPA: 9.6 / 10.0
TKR College of Engineering and Technology | 2021 – 2024

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, SQL, C
- **Backend Development:** Spring Boot, Spring Security, REST APIs, Microservices, System Modelling, MERN full stack.
- **Databases & Caching:** PostgreSQL, MySQL, Oracle, MongoDB, Redis.
- **AI & Machine Learning:** Machine Learning, LLMs, RAG, Agentic AI / Multi-Agent Systems, Prompt Engineering, Scikit-learn.
- **Version Control, Tools & API Development:** Git, Github, Docker, VS Code, REST APIs, Postman.
- **Core Computer Science:** Data Structures & Algorithms, DBMS, Operating Systems, Object Oriented Programming.

EXPERIENCE

AI/ML Intern — UptoSkills | Dec 2025 – Mar 2026 | *View Certificate*

- Contributed to AI-powered Resume Builder and Mock Interview modules for content generation and response processing.
- Collaborated on feature development, application integration, API testing, and software quality practices to deliver reliable solutions.

PROJECTS

Poshan Drishti — Hidden Hunger Risk Assessment & Nutrition Guidance
React Native, Python, FastAPI, SQLite, SQLModel, XGBoost | *GitHub* | *Live Demo*

- Designed and deployed an AI-powered system that predicts micronutrient deficiency risk (Iron, Vitamin B12, Vitamin A, Calcium, Zinc, Folate) from dietary intake and recommends budget-friendly food substitutions.
- Benchmarked Logistic Regression, Random Forest and XGBoost with an 80/20 split and SMOTE class balancing; selected XGBoost for production, reaching ~87% average accuracy across six deficiency predictions.

ClaimGuard — Agentic Resume-to-JD Verification & Gap-Audit System
React, Python, FastAPI, LangGraph, LangChain, Google Gemini API, ChromaDB, SQLite, PyMuPDF, HTTPX, Docker

- Developed a multi-agent AI system that analyzes resumes and job descriptions to measure skill alignment and identify missing qualifications using LLMs and RAG.
- Built an automated verification agent to validate GitHub repositories, portfolio links, and certificate URLs, detecting broken or inaccessible resources before submission.
- Generated personalized gap-analysis reports and company-specific mock interview questions using LangGraph-based agent orchestration and retrieval-augmented generation (RAG).

ACHIEVEMENTS

- Secured an overall Rank of 857 in the TG ECET entrance exam, earning the TG EPASS Scholarship for full tuition fee reimbursement.

CERTIFICATIONS

- AI/ML Virtual Internship — EduSkills & AICTE *View Internship*
- Python Essentials 1 & 2 | Introduction to Modern AI | Intoduction to Data Science — Cisco Networking Academy *View*
- Introduction to Internet of Things | The Joy of Computing Using Python (Top 5% + Elite + 94%) — NPTEL (IIT) *View*
